

Manila Water Company

FUNCTIONAL SPECIFICATION – REPORT

DID_R2R_ Sales Report

[How to use the Template: This chapter gives only explanations on the template. Remove it before completing the template.

Blue text is always intended as instructions, guidelines, explanations, hints, and tips. It should always be removed from the template for the project.

Update Fields in Document: If you want to update all fields, press "CTRL+A," then "F9". You will get pop-ups sequentially, which ask you for the new values. Afterwards go to the footer area, then press "CTRL+A" and "F9" again.

Top-level chapters may not be deleted or inserted; required additions should be made as sub-chapters to existing chapters to provide a consistent representation of this document to the customer. To keep the numbering of the chapters consistent over all specifications (of the project), do NOT delete top-level chapters that are not relevant in a concrete document; only mark them as not relevant (that is, add "not relevant" or "not applicable").]

[Document Version Status has four values: Draft, Ready for Review, Reviewed with Comments and Final. If the document send by an Author(s) without an intention of a Review should have a status as Draft. A Draft document may have some incomplete sections.

If the document send by an Author(s) with an intention of a Review should have a status as Ready for Review. All the sections in the document are expected to be completed in this case.

Reviewer(s) should set only two statuses:

- Reviewed with Comments – if documents needs to send the document to Author(s).
- Final – marks the acceptance of reviewer for the document.]

You can for example number the appropriate versions as follows:

- 0.1 Draft
- 0.2 Ready for Review
- 0.3 Reviewed with Comments (in case document is send back to author(s)
- 0.3 Ready for Review (in case of major changes)
- 1.0 Final

In case of fundamental changes:

- 1.1 Draft (new draft version that has to pass a review again)
- 1.2 Ready for internal review
- 1.3 Ready for Review
- 2.0 Final

Document Organization

This section provides details about this document, previous version(s) of this document and the document(s) referred.

Document Log

[Please specify information about Version changes in the following table. The first version should be specified in the first row and the current (latest) version should be specified in the last row]

[The Version Created by details should be specified as:

First Name followed by Last Name

Email

Company]

Following table mentions the version changes and the processor(s):

Version	Status	Date	Version Created by (Name/E-Mail/Company)	Role	Comments
0.1	Draft	Feb 14, 2026	Perez, Homer (homer.perez@manilawater.com)	SDL	Author
V.2	Draft	01 July, 2026	Suvankar Kuila	Consultant	Make correction as per new requirement.

Integration, Document Reference

[Reference to other content-related documents. For example:

Reference to solution proposal or business process description,

References to other specifications of the same project,

References to documents of earlier project phases,

Following documents are

S. No.	Referred Document Name	Referred Document Version	Referred Document URL (Optional)

The documents listed here are explicitly not part of this Functional Specification. They are not automatically accepted together with this Specification but may be subject to a separate customer/SAP acceptance.

Justification

This report is for tax compliance and audit purposes, particularly books of accounts, sales journal,

summary list of sales. This report shall reflect all movements to selected accounts receivable GL Accounts. The downloaded Summary List (.dat file) shall pass the BIR validation requirement.

[Provide a high level description reason from deviation from standard SAP reports or BW reports.]

Functional Description

Generate a report for all debits to accounts receivable GL account including reversals and revisions for both R2R and L2C.

1. Contents:

Report Type	Columns	Contents	
Sales Journal	Column C to S	Consolidated	Header Level
Summary List	Column D, E, F, G, T to AA	Consolidated	Header Level
Detailed List	All Columns	Transactiona	Line by Line

S4 Hana_Sales
Report_Non-Trade_Ta

[Please provide a high level description of the report and the business requirement that will be addressed.]

Example: The report will allow users to display contracts that are due to expire and to view the details of these contracts]

Transaction Volume

[N/A]

[Please provide an indication of the expected number of records that will need to be read and displayed using this report]

Example: The expected number of records to be displayed on this report is between 10 and 30 from approximately 200 current contracts]

Frequency & Timing

The report is expected to be generated on a monthly basis or as needed for tax audit purposes. =

[Please indicate the frequency that the report should run; i.e.) Ad Hoc, Daily, Weekly, Quarterly etc. and any timing considerations that should be applied; i.e.) must be run before 7am Monday morning]

Example: The report will be run on a monthly basis on the last day working day of the month.

Dependencies

<N/A>

[Predecessors and successors]

Selection Criteria

This is discussed below in functional design.

[Please enter the selection criteria that should be available to users before running the report. Indicate if the criteria are optional or mandatory and if any data restrictions should apply]

[Any grouping of selection screen fields into blocks? Title of Selection Screen Block?

Any preferred layout of the Selection Screen?]

Validation of Selection Criteria

[Any non-standard help required on selection fields?]

Authorization Requirements

TCode	ZTR_R2R_TAX_SALESREPORT
Fiori App name	Tax: Sales Report – Non-Trade

Task-Based Role: FIN: FI - Custom Object 6 Processing

HR Roles

Finance Section Head - Tax Compliance

Finance Associate Manager - Tax Compliance

Finance Associate Support - Tax Compliance

Finance Section Head - Tax Operations

Finance Associate Manager - Tax Operations

Finance Senior Specialist - Tax Operations

Finance Section Head - Tax Planning and Advocacy

Finance Manager - Tax Planning and Advocacy

Finance Associate Manager - Tax Planning and Advocacy

[Please fill this section if there are special Authorization Requirements; else mention N/A. Every authorization object needs to be documented to provide the security administrator information on the purpose and use of the object. The following sections are the minimal documentation requirements]

Authorization Definition

[The definition establishes the purpose and or use for the object. Mention a standard object available to be used or custom authorization object to be created (if needed).]

Defined Fields

<N/A>

[The defined fields should be listed with the valid values to be used. (Like Activity 01/02/03)]

Procedure

[The procedure section helps to explain how this object is to be used. Examples with field values and explanations should be provided.]

Variants

N/A

[Selection profiles for pick list of pre-defined report options for the end user.]

Functional Design

Process Flow

Step	1. Parameter Entry	2. Report Generation	3. Report Display	4. Output Selection	5. Output Generation	6. Log Recording
FAO	User	System	System	User	System	System
Detail	Report Parameters are entered	Report is created based on the mapping and logic provided (with reference to entered parameters)	Report is displayed in ALV Format Screen contains buttons for Output options	Output options is selected (.csv or .dat format)	Output File is generated for download	Execution Logs are maintained
Action	Execution is triggered	Generates Screens Output		File creation is triggered		

1. Parameter Entry
 - Screen Title: “Sales Report (Non-Trade)”

GENERAL SELECTION

Technical Name	Field Name	Format	Table Value/ Checkbox/ Radio Button/ Radio Button Group	Select Option or Parameter	Mandatory or Optional	Entry	Field Labels
RBUKRS/BUKRS	Company Code	Alphanumeric	Table Value	Select Option	Mandatory	Single	
BUDAT	Posting Date	MM.DD.YYYY	Table Value	Select Option	Mandatory	Single (Range)	

GJAHR	Fiscal Year	<same as with reference Field>	Table Value		Mandatory	Single (Range)	
KUNNR	BP Code	<same as with reference Field>	Table Value		Optional	Multiple	
	With Details		Checkbox		Optional		

OUTPUT OPTIONS

Sales Journal	CHAR	Radio Button
Summary List	CHAR	Radio Button
Detailed List	CHAR	Radio Button

NOTE: Only one radio button can be selected at a time. The three radio buttons are mutually exclusive.

Validation:

- Check for Mandatory fields
 - o IF Mandatory field is empty, then Status error
- “Please enter Mandatory Field <Field Name>”

is raised in the Status Bar

Screen (Proposed):

Sales Report (Non-Trade)

Selection Parameters

Company Code * to

Posting Date * 01/01/2024 to 12/18/2025

Fiscal Year * to

Customer Number to

Report Options

☐ With Details

2. Report Generation

The Report Body part can be generated in two ways:-

- ~~Summary List(combined Sales journal and summery list)~~
- ~~Summary List with Detailed List~~

A)

~~Upon clicking on back button report will come back to the detailed view automatically.~~

- ~~For Summary List with Detailed List option, the Summary List columns are expected to repeat for each line item (as the Detailed List is just a break down of the Summary List)~~

Eg:

1. ~~Document Captured~~

Option 1: Summary List only

Line	Columns
1	<Summary List of Document>

Option 2: Summary List with Detailed List

Line	Columns	
1	<Summary List of Document>	<Line 1 of Detailed List of Document>
2	<Summary List of Document>	<Line 2 of Detailed List of Document>
3	<Summary List of Document>	<Line 3 of Detailed List of Document>

- ~~Mapping for both options can be referenced on the Report Details tab in the attached file “Sales Report Mapping”~~

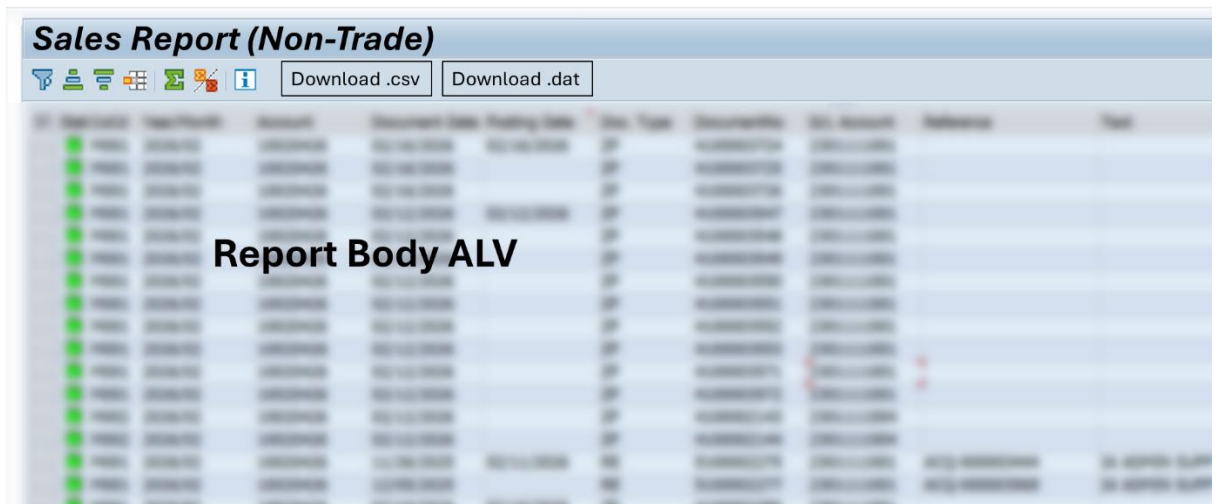

Logic for report determination

IF “With Detail” Checkbox is ticked
 THEN Report Summary List with Detailed List
 ELSE Report Summary List(combined Sales journal and summery list)
 It will be a Hierarchical Sequential ALV report.

3. Report Display

- Report is to be displayed in standard ALV
 - ~~For both “Summary List” and “Summary List with Detailed List” option~~
- Trigger for Output Selection are integrated into the Application Toolbar (detailed on #4) as buttons
 - Output .csv
 - Output .dat
 - Excel file

Screen (Proposed):

4. Output Selection

- Once the ALV screen is generated, User has the option to download the report
- Download is initiated by the Output buttons in the ALV screens

Button	Action
Output .csv	Trigger File Download of the Report in CSV format
Output .dat	Trigger File Download of the Report in CSV format
Output .XLXs	Trigger File Download of the Report in EXCEL format

5. Output Generation

- Standard SAP Download Functionality
- File format is referenced on the User selection on #4
- Header Details is to be placed on top of the Report

Header Details
Report Details columns

- Output is to be grouped on a per Company Code basis. For scenarios where there are multiple Company Codes selected, each Company Code containing the respective Header and Report Body will be generated in sequence. Please see illustration below:

Output File
Header Details (for Company Code 1)
Report Body columns (for Company Code 1)
Header Details (for Company Code 2)
Report Body columns (for Company Code 2)

- Mapping for the Header details can be referenced on the Header tab in the attached file “Sales Report Mapping”
6. Log Recording
- Each session executed (Step 2 is reached) has to be listed in the Execution Log custom table. Please see details below
 - Table Name: <tbd>

Technical Name	Field Name	Format	Comment
RBUKRS/BUKRS	Company Code	<same as with reference Field>	From Parameters/Initial Values
BUDAT	Posting Date	<same as with reference Field>	From Parameters/Initial Values
CJAHR	Fiscal Year	<same as with reference Field>	From Parameters/Initial Values
KUNNR	Customer Code	<same as with reference Field>	From Parameters/Initial Values
	Output Option	String	Either “CSV” or “DAT” or “EXCEL”. If Step 4 is not reached, leave blank
USNAM	Executed by	<same as with reference Field>	
CPUDT	Date Executed	<same as with reference Field>	
CPUTM	Time Executed	<same as with reference Field>	

Output

[Please indicate the expected output method(s) for the report]

[Example: Saved to File / Sent to print / Send to email account / Download to excel\]](#)

Main Heading

<See section 12.5>

SALES REPORT - NON-TRADE

Sub Heading

The report shall display the following information in the header section before the transaction details. The header information will be retrieved from SAP standard tables, custom configuration tables, and system fields.

Reporting Period:	From and To	mm/dd/yyyy to mm/dd/yyyy
Taxpayer's Registered Name:	Company Code Information	
Taxpayer's Trade Name:	Company Code Information	
Taxpayer's Address:	Company Code Information	
Vat Reg TIN:	Company Code Information	
Software Name:	CAS Information	SAP S/4HANA 2023
Version Number:	CAS Information	FPS02
BIR Permit No:	CAS Information	
Generated By:	Last Name, First Name	
Date Generated:	mm/dd/yyyy	
Time Generated:	XX:XX:XX AM/PM	

[Provide any required sub-headings and breaks required in the report]

Example: There will be a sub section under the main contract information detailing the date and time the report was executed and the users username]

Output Layout

Report Header & Footer

[If deviation from the project defined header and footer is required mention Report Header and Report Footer]

Assumptions in Functional Design

- A Report will be generate based on the NON-trade GLs accounts shared by business.
- B Revenue and NON-Revenue GLs will be picked using below logic
 - P&L GLs are revenue items
 - Balance sheet GLs are NON-Revenue
- C BP address 2 data will be populated once the characters are over populate.

D Withholding tax column will be blank always.

E If the it is a sales invoice then the recon account will be print in the debit side and it it is a credit memo then it will be printed on the credit side. This is similar for other GLs line item account also.

F Discount column shall reflect posted amounts on the below GL accounts

Sales Discount - Residential 4601211001

Sales Discount - Semi-commercial 4601213001

Sales Discount - Commercial 4601212001

Sales Discount - Industrial 4601214001

Sales Discount 4601219001

NOCP - Sales Discount - Residential 4601211201

NOCP Sales Discount - Semi-commercial 4601213201

Create a TVAPVC for the ZSALES_DISCOUNT [Describe any assumptions that have been made in the process of completing this design.]

Open Issues in Functional Design

N/A

[Please specify any open issues like missing functional information, users, details etc. which should be discussed in in subsequent phases of the project. Any open issues when cleared should be added to the relevant sections of this document in a new version.]

Business Test Conditions

<To be Completed>

[Please indicate the business level test conditions that should be used to verify successful operations of the Report]

[Document all technical scenarios associated with this development. Examples would include 1) testing an error-free run; 2) testing the exception processes; 3) testing the error handling.]

[Document all control scenarios associated with this development. Examples would include 1) Rounding of dollars and cents; 2) Audit trail processing; 3) Reconciliation reporting]

IMPORTANT: The developer will need to test repeatedly, so where appropriate provide instructions to reverse the actions performed so the test may be run again, or explain how to create new input data to the test.

Scenario	Input Selection Criteria	Expected Result
----------	--------------------------	-----------------

1	General Sales Report - Detailed	All debits to AR GL accounts are accounted for and information per rows are complete and accurate.
2	General Sales Report – Sales Journal	All debits to AR GL accounts are accounted for. Correct Columns are reflected with complete and accurate information per row.
3	General Sales Report – Summary List	All debits to AR GL accounts are accounted for. Correct Columns are reflected according to output option with complete and accurate information per row. DAT file shall pass the BIR validation.

Functional Logic or criteria to get the values:

1. Pass

Company code (BUKRS)

Posting date (BUDAT) and GL account maintained in TVARVC ZSALES_NONTRADEGL into

ACDOCA-RBUKRS

ACDOCA-BUDAT

ACDOCA-RACCT

ACDOCA- RLDNR = "0L"

Then

Joint table BKPF and ACODCA on BUKRS, BELNR, GJHAR and fetch

BKPF-BUDAT

ACDOCA-HSL

BKPF-BKTXI

BKPF-XBLNR

BKPF-BELNR

ACDOCA - RACCT

BKPF-BLDAT

ACDOCA-POPER

ACDOCA-BSCHL

ACDOCA-BLART

ACDOCA-MWSKZ

ACDOCA-KUNNR

ACDOCA-RBUKRS

BKPF-BRNCH

ACDOCA-PRCTR

ACDOCA-KOART

ACDOCA-KTOSL

ACDOCA-BUZEI

ACDOCA-DRCRK

Keep these data separate and based on this the logic will work.

Note:

TVARVC table to be maintained for below item

ZSALES_NONTRADEGL – For NON trade GLs accounts

ZSALES_NFT – For NFT Value

ZSALES_LFT – For LFT value

ZSALES_VAT – For VAT

ZSALES_NQVAT – For Not qualified for output VAT code.

ZSALES_EXMPVAT – For Exempt VAT code.

ZSALES_ZEROVAT – For ZERO VAT code.

ZSALES_TAXNVAT – For Taxable Net of VAT.

ZSALES_DISCOUNT – For discount GL
